

# DSRAZOR

## Privileged Access Management and Auditing for the Windows® enterprise.

Does your Windows® environment have a defined security standard? You know having a secure network is essential in warding off harmful activities from ransomware to data theft. Even when present, a security baseline is only effective if it is consistently enforced. Visual Click's DSRAZOR for Windows® provides you with the tools you need to create, maintain and enforce your security standards.

Preventing security incidents does not occur by accident. Setting and enforcing security standards helps your posture and reduces the chances of an incident and resulting fallout.

Perhaps you inherited a Windows® network without security documentation or even a security plan. Maybe yours is a well-thought-out and maintained environment but lacks a method to help you remove administrative and change permissions from your helpdesk, HR team and others. DSRAZOR, including the Zero Privilege option, provides all the functionality you will need for both occasions.

## Highlights

- **DSRAZOR** provides customizable Windows® applets for reporting, creating, managing and more. DSRAZOR's Zero Privilege functionality allows removal of direct file system and Active Directory permissions further enhancing the security posture of your environment.
- **DSRAZOR** customized reporting consoles can be easily distributed to your management and other teams to provide the reports they require, both interactively and scheduled with email delivery.
- **DSRAZOR** helps you find and correct security weaknesses in your Windows® File System permissions (Shares, Folders and Files).
- **DSRAZOR** helps you find and correct security weaknesses in your Active Directory, and Azure Active Directory (Microsoft Entra ID®).
- **DSRAZOR** customizable security applets further your standards by ensuring correct user creation and management including for helpdesk teams.
- **DSRAZOR** provides regular reporting to ensure your security standards and baseline are being maintained.
- **Visual Click Software's DSRAZOR** product is designed to be part of a comprehensive security approach.
